

IDENTIFY YOUR NETWORK

Automatically discover the network addressing of production networks.

MANAGE CRITICAL INFORMATION FAST

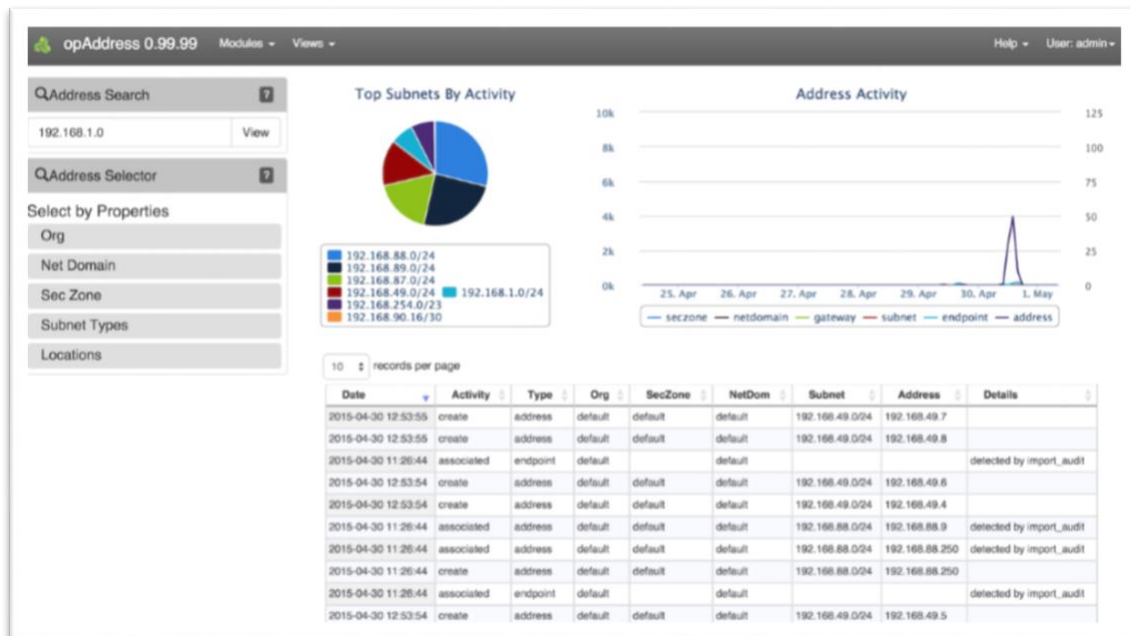

Search, view, manage address information, ensuring a critical information baseline is established.

FIND PROBLEM SUBNETS

Identify subnets causing problems for servers and users in your network.

DETAILED SUBNET ANALYSIS

View IP Address lists including reserved IP addresses, available addresses and drilldown into address history.

Eliminate IP address conflict by regaining control of ip address usage in your organization using opAddress.

IP address space auditing, tracking, allocating and managing requires a simple, accurate and extensible system to be effective. opAddress acts as a lightweight IPAM solution, providing periodic scanning of subnets to determine use of address space and allowing quick and easy editing and reallocation.

opAddress can handle complex environments with multi-tenancy, overlapping address spaces and complex security domains easily.

RECOMMENDED REQUIREMENTS:

UNDER 250 NODES	UNDER 1000 NODES
Dual core processor	Quad core processor
4Gb of RAM	8Gb of RAM
20Gb HDD	80Gb HDD
